KPMG

A NEW CORPORATE TREASURY COURSE

You asked. We listened.

We have redeveloped the Corporate Treasury Course to make it even better. The course is now streamlined and focused on issues relevant to hands-on treasury practitioners. We have added new materials on topics such as credit risk and operations and embedded extra opportunities for participants to practice the material being taught.

Our aim is to assist participants to be better equipped at managing financial risks in a treasury environment. A range of case studies and practical exercises bring the theory to life and make the course a stimulating and enjoyable experience.

What past participants had to say

“I found this course excellent, sufficiently covering all aspects of treasury management. Well-run, content was relevant and presented effectively.”

“Highly valuable, pleasant to experience perspective from others in the industry with interesting dialogue between participants.”

“Excellent, explained concepts clearly and enabled me to feel confident discussing these concepts with experts.”

Who should attend?

- accountants
- finance managers
- internal auditors
- treasury officers/ managers
- treasurers (new to role)
- GM Finance

THE COURSE OVERVIEW

The Treasury Management course is designed to provide hands-on training to executives and managers in either large or small private and public sector organisations.

The course assists participants to:

- Identify and develop key strategies for treasury management.
- Understand the application and valuation of financial instruments.
- Attain familiarity with the practical requirements of the accounting standards relevant to treasury management.
- Apply the principles learnt in a half day case study.
- Network with other finance and treasury professionals.

This course is designed for current practitioners and for those interested in working in treasury management.

- It presents a holistic understanding of treasury management from first principles and introduces participants, in an intuitive manner, to the concepts and logic that underpin financial risk management, financial instruments and derivatives.
- A stimulating and interactive course that provides the opportunity to explore your ideas and knowledge and gain pragmatic insights into how others are managing financial risks.
- Designed and presented by facilitators from a premier professional services firm – with treasury management expertise and personal examples gathered over decades.
